

Safe for people, animals, plants and our environment. Biodegradable, non-polluting, chemical-free and non-flammable. Save money. One bottle equals 200 gallons of window cleaner or 64 gallons of your household cleaner.

Sunshine Concentrate Uses and Instructions

Hang inside cabinet door. – Add essential oils to any recipe for potent antimicrobial properties.

GENERAL CLEANING

Household Cleaning – Appliances, Kitchen and Bathroom Countertops, Fixtures – Add 1-1/2 t. to a quart sprayer bottle of water. Add 20 drops Tea Tree, Pine or Lemon Oil for antibacterial spray

Mirrors, Windows, Glass – 1/4 t. per quart

Vinyl or Wood Floors – 2 T. per gallon of hot water. Rinse thoroughly before applying wax.

Ceramic Tile – 2 T. per gallon of water. Sponge or spray on. Rinse.

KITCHEN USES

Dishwashing – 1 T. in sink, adjust for heavy grease

Fruit and Veggie Wash – 1/2 tsp. per basin of cool water (put water in first, then SC, swirl, and add produce). Let sit 20–30 minutes. Removes sprays, waxes and pesticides.

Odors – Apply full strength to remove odor of onions, fish, etc. – In thermos or bottles, add few drops after filling with water, shake, let sit, and rinse

LAUNDRY

Washing Machine – 3 pumps for full load, adjust for smaller. Add vinegar to fabric softener dispenser.

Stain Removal – Use full strength before laundering, to help remove ball-point ink, chocolate, lipstick, shoe polish or grease from washable, color fast material.

Clothes Dryer – Spray dryer from Household Cleaning bottle to prevent static cling

Hand Washables – 1 tsp. per quart lukewarm water. Use for silks, woolens and other fine washables.

Diapers – 2 t. in pail eliminates odors

BATHS

Shower Gel – Mix 2/3 Sunshine Concentrate to 1/3 water in bottle. Add 7 drops of favorite essential oil.

Bath – 2 t. to tub (no bathtub ring)

Hand Soap – 2 pumps to 8 oz. bottle (put water in first). Add essential oil for antibacterial action.

OTHER HOUSEHOLD USES

Plumbing – Using regularly as hand soap at sinks keeps pipes open – emulsifies grease.

Carpet Stains – Apply full strength, rub in, let sit a few minutes, blot and rub out.

Combs and Brushes – 1 pump per basin warm water. Let soak 1–2 hours, rinse and air dry

Golf Clubs, Balls & Gloves – 1 t. to 1 pint of water for cleaning

Humidifiers – 3 to 4 drops in water to help prevent rust and scum. Eliminates mineral deposits.

Leather – 2 drops on damp sponge – cleans better than saddle soap.

Shaving – Full strength with a little water to make lather. Safer on the skin.

Wallpaper Removal – 2 T. to a gallon pail of hot water, apply with swab or mop and lift off.

Outdoor Uses

Auto Window Washer – 5–6 drops per quart

Battery Terminals – 1/2 t. in pint of water. Spray on, let soak for 2 minutes, then clean.

Boat Algae – 1 T. in gallon of water.

Car Wash – 2 T. per gallon warm water

Concrete and Mortar Mix – 2 T. to 1 gallon of water to make mixture spread easier and set harder.

Engines – Use 2 T. to one gallon water to clean engine. Will not effect paint, gaskets, or insulating material, Best results can be achieved when the engine is hot for faster drying of the ignition system. It happens to be a good lubricant!

Fertilizer – 2–3 drops per quart, use weekly

Insect Repellent – Full strength or with equal parts water applied to skin.

Paint Brushes – Work full strength into brush, wash with warm water.

Rose Bushes – 1 t. per gallon or 1/4 t. per quart – Spray to protect from red spider and diseases.

Windows and Screens – 1 t. to 2 gallons of water for spray cleaner.
